Muhammad Lafran Pane

Senior Android Developer — Kotlin, Jetpack Compose, multi-module architecture

EMAIL myspoonart@gmail.com WEB spoonart1.github.io LINKEDIN m-lafran-pane GITHUB spoonart1

CURRENT ROLE **Senior Android Developer** at SWAT Mobility

EXPERIENCE B2C, B2B, Marketplace, Retail, Food, SaaS

TECHNOLOGIES Kotlin, Java, Android, Jetpack Compose, Room, SQL, Groovy, Fastlane, Jenkins, Playwright, Appium, Postgres, iOS, Swift, Golang, PHP, C#, Unity

AT WORK I'M BEST AT…

Self-managed and support-oriented: I spot gaps, solve problems proactively with data-driven decisions, adapt quickly, and add value without needing direction.

Portfolio and selected work at spoonart1.github.io.

WORK EXPERIENCE

Senior Android Developer, SWAT Mobility

JUN 2023 — PRESENT

Route optimisation platform · B2C, B2B

`Kotlin` `Android` `Compose` `Room` `SQL` `Groovy` `Java` `Fastlane` `Playwright`

- Worked remotely as an Android Engineer with very minimal supervision.
- Led the initiation of CI/CD pipelines — from none to existing, publishing and distributing the app **100% through CI/CD** to Play Store, Firebase and Huawei AppGallery.
- Redesigned the Android architecture from a **single module to 37 modules**.
- Developed AI agents for UI automation, crash fixes and PR processes, increasing efficiency and productivity **by up to 70%**.
- Successfully migrated **100% of the map SDK from XML to Compose UI**, currently active and in use by end users.

Senior Android Developer, Moladin

NOV 2022 — FEB 2023

Platform for buying and selling used vehicles · B2C, Marketplace

`Kotlin` `Java` `SQL` `Jenkins`

- Developed essential Android features for Moladin to support sales operations and enhance workflow efficiency.
- Mentored Android engineers on clean, maintainable and scalable coding practices, emphasising organisation-wide code quality.
- Ensured engineering excellence through code reviews, technical guidance and consistent coding standards across the Android team.
- Pioneered the implementation of CI/CD using Jenkins.

Android Developer, Self-employed

FEB 2022 — OCT 2022

- Freelance Android development.
- Learned Jetpack Compose and Flutter development.

Engineering Manager (Moka — GoTo), Gojek

JAN 2021 — FEB 2022

Point of sale · B2C, Retail, Food

`Kotlin` `Java` `Android` `Postgres` `Appium`

- Managed a diverse engineering team of **13 members** — Android, QA and backend engineers — ensuring timely delivery of product features while maintaining high quality.
- Led the establishment and implementation of team OKRs and KPIs to enhance engineering productivity, product quality and delivery performance, aligning technical efforts with business goals.
- Achieved a remarkable increase in Android crash-free user rate **from 82% to 99.3% within two months** by focusing on crash stability as a key engineering objective, leading to enhanced production reliability.

Android Engineer, Moka POS

NOV 2018 — JAN 2021

Point of sale system · Retail, SaaS

`Kotlin` `Android` `Room` `SQL` `Groovy` `Jenkins`

- Completed the transition and enhancement of outdated Android elements to resolve compatibility challenges caused by changing Android OS standards and Google platform limitations, ensuring ongoing product reliability and ease of maintenance. **27 outdated sync items, released 100%** → increased crash-free users towards 92%.
- Released **4 complex features** in the POS system — checkout, registration with KYC/KYB form, payment and receipt printing — in under 6 months.
- Completed the migration from traditional SQL queries to Room — **90 tables** migrated, finished with gradual releases over around 6 months.

Lead Mobile Developer, Docotel Group

JUL 2017 — OCT 2018

`Java` `Android` `iOS` `Swift` `Golang`

- Lead Mobile Developer responsible for mobile app development.
- Acquired new experience and enjoyed collaborating with diverse teams.

EARLIER EXPERIENCE

Android & iOS Front End Developer, PT Indiva Finansia Teknologi

JUN 2015 — JUN 2017

`Java` `Android` `iOS` `Swift`

- Built Android front ends in Android Studio with the Java Android SDK — constraint layout, Google Material Design, multiple screen sizes, portrait and landscape orientations.
- Developed iOS applications as a front-end programmer: custom views with XIB files, Playground in Xcode, Swift 3.
- Managed the team, reported and delivered progress to the client handler, and researched new development tools to increase production speed.

Project Manager, Agate Jogja

AUG 2012 — OCT 2014

- Set the project timeline.

Unity & Flash Developer, Agate Jogja

DEC 2011 — OCT 2014

`C#` `Unity` `PHP` `ActionScript 3`

- Developed cross-platform applications for iOS, Android and Windows using Unity.
- Created Flash games using ActionScript 3.0.

EDUCATION & MORE

EDUCATION

STMIK AMIKOM — Diploma 3, Informatics Technology

JAN 2009 — JAN 2012

LANGUAGES

English, Indonesian

INTERESTS

I love talking about stocks, AI, travelling and gaming :)
